User Opinions That's what people say about Sort MP3 possibilities:"On our radio station, as on any other, is stored a large amount of music records. Some of them are played regularly, some of them not. To find needed music record in our audio archive, where are stored thousands of MP3 files, is very hard. We had to hire a special employee, who categorized records in archive, but even such salvation was not perfect - we periodically received several thousands of records in a day, and a person who organized them, could not sort and organize them all and made a lot of errors. All this unsorted music records collected, collected and collected... One day while real-time broadcasting music clips, prepared to transmission, were lost in all this chaos and we were forced to break transmission. My colleague from another radio station called me, when knew about incident, and advised to use Sort MP3. Over several hours all our thousands of MP3's were sorted and organized and even if we are gathering several hundreds of new audio records every day, Sort MP3 easily append them to common music base - right from audio CD's! Thanks very much to all Sort MP3 developers. MP3 file sorter, that they made, really helps people."

"At April issue of "My Computer" magazine I read that Sort MP3 is the easiest and most user-friendly way to sort, rename and organize MP3 files. I have large MP3 file collection on my computer. Several first years it was easy to maintain it, but now, when I periodically download variety of MP3 files from Internet it became very hard to find something in my MP3 miles collection. I did not know what to do - variety of folders and in every of them are MP3 music files those I even never heard. I even wanted to stop collecting of MP3 files, but suddenly come in mind that article - and I downloaded and started Sort MP3. It was like a miracle - all my MP3 files were sorted, renamed, organized automatically, exactly as I wanted. Really useful MP3 file sorter - It is needed for everyone who has MP3 files and wants them to be in ideal order."

Our mission

Why it is important to use Sort MP3 on your computer? Why it is important to sort MP3 music for it to be in ideal order? Today life is impossible to imagine without information, and information - without files. By reports, provided by independent researches, now more than 95% of information is stored in files.

It is important to sort MP3 files on your computer right now, but let's take a little trip to history. In 1970's, when first floppy disk was invented, it had 0,1 Megabyte size and often holds up to 15 files. By size it was less than 1 today MP3 music file. In 1980's was invented CD disk, which already had 500 Megabyte size and could hold already thousands of files. By size it could hold already hundreds of MP3 music files. In 1990's became popular DVD disks, which could carry already dozens of thousands of files and hundreds of MP3 music records that also should be sorted. Today most of files are stored on HDD (Hard Disk Drives), which are presented in every computer. They have size beginning from 90 000 Megabyte and hold millions of documents and may hold thousands of MP3 music files. Sort MP3 music in such amounts manually is impossible.

Several weeks ago was already started production of Hard disk with 800 000 Megabytes size, that is able to store already milliards of MP3 music files in variety of formats - and you, as potential owner of such hard drive with MP3 files, should sort MP3 files on it for your MP3 music to be in order. How to sort MP3 files when you are gathering variety of them every day, again and again?

When on a computer is stored such variety of files (including MP3 music files, those also should be sorted using an MP3 sorter), especially if they are packed in numerous of archives, it is extremely hard to navigate between them. People often don't know, what files and where are stored.

When in a folder several hundred, or even thousands of files with names like "640info.txt", "important(14).doc", "mp3\_21.rar", "confer46.avi", "d24.zip" it will be needed days, or even weeks and months to understand, what is inside, sort all and move all in folders, according to content.

And even more - the whole directories are deleted, because there is no possibility to find out, what is inside and use such content. You are in the danger! Is any salvation of such heavy situation? Yes, and it is - Sort MP3. So, How to sort MP3 music easily?

Everybody heard the magic word "MP3": MP3 music player, sort MP3 music, mp3 music sorter. But do you know what is exactly means this abbreviation, what means the phrase "Sort MP3"? What will be sorted?

"MP3" phrase is an abbreviation of MPEG-1 Layer Audio 3. It is an audio (including music) compression format. Today it is a common audio format for consumer audio storage, and it is used in at least every digital audio player. So, when somebody say that he sort MP3, than it mean he sort music files on his computer to get them to be in order.

MP3 audio format was developed in 1991 by several organizations, including AT&T-Bell Labs in Murray Hill, United States, and Fraunhofer IIS in Erlangen, Germany.

MP3 music compression format use a lossy compression algorithm. That's why it is giving ability to compress a whole 9 CDs in the way they will have a size of the 1 CD. An MP3 file that is created using the mid-range bitrate setting of 128 kbit/s will result in a file that is typically about 1/10th the size of the CD file created from the original audio source. An MP3 file can also be constructed at higher or lower bitrates, with higher or lower resulting quality. The compression works by reducing accuracy of certain parts of sound that are deemed beyond the auditory resolution ability of most people. This method is commonly referred to as Perceptual Coding. Of course, to sort MP3 music you should not know all about MP3 music format, but if you want - here are some details: It internally provides a representation of sound within a short term time/frequency analysis window, by using psychoacoustic models to discard or reduce precision of components less audible to human hearing, and recording the remaining information in an efficient manner. Now you see - when somebody say he want to sort MP3 files than it mean he want to files with compressed music inside. This is relatively similar to the principles used by JPEG, an image compression format. Now you know that sort MP3 files means to sort music files stored on your computer, sort MP3 files stored on your CDs and DVDs, sort MP3s stored inside of your local network, sort MP3 music on your memory drives and media player.

So, how to sort MP3 music? And not just sort MP3 music, but sort MP3 music easily. To sort MP3 music you first should choose, how your MP3 music should be sorted.
